

The independent solution

About AirisQ Limited

is a company providing unique independent services for not only the building services industry and property managers, but directly to the ventilation hygiene providers. We offer experienced management solutions to your business and workplace environmental needs.

Our expertise covers:

Consultancy - whether it is to help you put together an appropriate tender for ventilation hygiene or provide tailored solutions for compliance with legislation, we assure you of a totally independent and confidential service.

Training services – covering best practice requirements, legislation and regulation compliance for building and property managers; technical, commercial, sales and marketing training for companies providing ventilation hygiene services.

Risk assessments, surveying, auditing and analysis services –

- Ventilation system conditions
- Indoor air quality
- Occupancy and workplace comfort conditions
- Fire safety for kitchen extracts
- Scored & weighted risk analysis

Local exhaust ventilation - COSHH compliance services

Facility & Project Management – total contractor management service from selection through implementation to completion and on-going asset investment protection through monitoring and service

Instrument and environmental equipment selection & sales - a unique service to provide indoor air quality monitoring equipment and consumable products for your operational needs.

use an independent UKAS accredited laboratory. This provides you with the reassurance that all of the data you receive from AirisQ is reliable and traceable to the national standard

There are now many providers in this industry to select from, the majority offers solutions to environmental issues but combined with their other services, such as ductwork cleaning and maintenance. Where your workplace environment is concerned you need to employ experienced specialists who truly understand the complex issues involved with an unbiased knowledge of how other specialists can help.

offers a range of environmental and business solutions to help you meet the demands of your customers. Our team of independent, experienced and qualified consultants means that you get the best quality service. We guarantee you receive totally unbiased recommendations based on actual findings, as we retain our independence by not selling contracting services.
